

TalentScout AI: Meet Lili

An AI agent that screens applicants, explains scores, and emails candidates for SMEs

100% Applicant Screening

Instantly evaluates every resume against technical role requirements without manual labor.

Explainable AI Scoring

Transparent ratings grounded directly in candidate evidence and verifiable skill metrics.

Automated Candidate Outreach

Sends personal invites automatically; every rejection waits for one-click recruiter approval.

BUILT FOR GROWING TEAMS

\$0 cost autonomous recruiter

Eliminates expensive ATS overhead while keeping high candidate engagement.

The SME We Built For

High-Growth, Resource-Constrained

COMPANY SIZE

10–50 Employees

HIRING PACE

1–3 Engineers / mo

Tech startups and boutique recruiting agencies operate without dedicated talent acquisition teams. Recruiting is handled entirely on top of primary duties by a single founder or office manager.

Enterprise ATS platforms like Greenhouse or Lever cost thousands of dollars annually—yet still demand human manual labor to screen each applicant.

Result: Severe recruiting bottlenecks that slow growth and damage candidate relations.

PRIMARY RECRUITING BOTTLENECKS

50–200 CVs Per Open Role

The overwhelming majority of resumes are never properly reviewed.

Communication Delays & Ghosting

Top talent waits days for responses; rejected candidates get no feedback.

"Good candidates wait days for a reply, while rejected ones are usually ghosted. Enterprise ATS tools still require a human to manually screen applicants."

THE SME CANDIDATE DROP-OFF PROBLEM

Manual screening overhead creates critical hiring lag

TRADITIONAL WORKFLOW

Before: Manual & Inconsistent

- 1 Download CVs from Email**
Manual extraction from inbox attachments.
- 2 Skim with Gut-Feel Bias**
Inconsistent screening without standard criteria.
- 3 Track in Spreadsheet**
Static data entry prone to error and delay.
- 4 Write One-by-One Emails**
Repetitive drafting of individual messages.

~20 min

PER CANDIDATE

High latency, inconsistent evaluation, and heavy recruiter effort.

TRANSFORMED WORKFLOW

After: Lili

- 1 Drop CVs & Instant Pre-Screen**
Browser-based quick intake and automated initial screening.
- 2 Evidence-Cited Deep Evaluation**
Objective scoring grounded directly in candidate evidence.
- 3 Live Ranked Pipeline**
TIER 1 TIER 2 TIER 3
- 4 Automated Outreach & Review**
Invites go out automatically; constructive rejections wait for one-click approval.

End-to-End Autonomous Candidate Pipeline

Lili operates on a zero-copy-paste continuous loop with automated scoring & reporting

Real-World Execution: 4 CVs, 1 Instruction

✓ **Autonomous Screening:** Lili screened all candidates without human intervention, citing specific evidence.

✓ **Live Integration:** Invite sent via Brevo (demo mode: recruiter's inbox); rejections await approval.

LIVE APPLICATION

SL

Sarah Lin

Score: **96/100**

TIER 1

VERDICT EVIDENCE CITED:

- "Storybook design system adopted across 6 product teams"
- "Improved LCP from 3.8s to 1.4s"

OTHER CANDIDATES (3)

TIER 3

Candidate B

Applied Caps: Missing core tech stack depth; non-verifiable metrics.

Candidate C

Applied Caps: Insufficient experience duration for senior requirements.

Candidate D

Applied Caps: Key domain skills absent in background review.

Live Dashboard & Activity Log

The system automatically logs each evaluation step in real-time and issues email confirmation via Brevo instantly upon candidate ranking.

Time Savings & Candidate Engagement Impact

66 Hours/Mo

Manual Screening Replaced Monthly

2 open roles × ~100 CVs × 20 min each. About 60 hours return to the team after reviewing Lili's shortlist.

Days → Minutes

First Reply Velocity

Time to first reply drops dramatically, ensuring top tier talent is immediately engaged before competitors.

CALCULATION CONTEXT & BENCHMARKS

~20 Minutes Saved Per Candidate

Lili automates initial candidate evaluation, freeing recruiters from repetitive manual screening tasks without sacrificing assessment depth.

80 Recruiter-Minutes Saved Per Run

In a single run of 4 candidates, Lili saves about 80 recruiter-minutes in batch processing, as detailed directly in Lili's performance report.

Works: live agent + 13 tests · **Time:** ~30 h saved per role · **Cost:** ~\$750 per role, \$0/mo stack · **Revenue:** more placements + rediscovery

Zero-Cost Tech Stack with High Financial Impact

Lili runs on a completely free tech stack totaling **\$0/month**, utilizing generous free tiers and hackathon credits to replace expensive enterprise software.

\$0 / MO**Vercel** — Dashboard hosting**\$0 / MO****Supabase** — Database & live sync**\$0 / MO****Brevo** — Delivery (up to 300 emails/day)**\$0 / MO****Wesam.ai** — Agent execution & credits

TOTAL MONTHLY SAVINGS

\$1,000–\$1,650 /mo

Direct Labor Savings + ATS License

Replaces ~66 hours/month of manual screening valued at \$15–\$25/hour, plus any ATS subscription you no longer need.

66 Hours Manual Labor Eliminated

Automates candidate screening, ranking, and notification delivery.

Faster, Fairer Hiring Generates Direct Revenue

✓ AGENCY SCALE

Recruiting Agencies

+1-2 Roles

per recruiter per month

~60 freed hours a month let the same recruiter take on 1-2 more roles.

+\$6k-\$8k per extra placement (15-20% fee on a \$40k salary).

✓ SPEED TO HIRE

Tech Startups

Instant Replies

respond in minutes, not days

Replies in minutes win top candidates. Talent rediscovery re-matches past CVs to new roles at zero sourcing cost.

Directly **prevents product roadmap delays** caused by empty engineering seats.

✓ CANDIDATE EXPERIENCE

Employer Brand

Zero Ghosting

respectful, specific feedback

Providing respectful, specific replies to every applicant completely eliminates candidate ghosting.

Significantly **boosts employer reputation** and drives higher organic candidate referrals.

Lili is Designed for Complete Trust

1. Explainable

01

Rubric breakdown, quoted CV evidence and the cap applied for every score. Lili scores blind; if she and the pre-screen would decide differently, a human reviews.

2. Fair

02

Bias-Free Mode hides names and emails; demographics and prestige are ignored. Prompt-injection tricks are flagged, and GitHub claims are verified.

3. Human in the Loop

03

Invites go out automatically. Every rejection waits for the recruiter's Approve & send, editable before sending. The rules live in the database.

4. Private by Design

04

Built with login authentication, row-level security, and owner-only database isolation so recruiters strictly access their own pipeline.

● Autopilot Intake & Scheduling

Automated Gmail intake, calendar booking confirmations, and seamless interview scheduling.

● Multi-Recruiter & Agency Portal

Expanding platform capabilities to support collaborative multi-recruiter teams and a dedicated agency client portal.

● Wesam.ai Marketplace Listing

Submitted to the Wesam.ai marketplace (in review) so any SME can hire Lili in one click.

"Lili turns 66 hours of manual screening into a few hours of review, on a \$0/month stack."
